Summary

Software engineer with a strong foundation in data structures, algorithms, and full-stack development. Builds production REST APIs and frontend systems at enterprise scale, backed by 1500+ LeetCode problems solved, two published IEEE papers, and a hackathon-winning automated QA pipeline. Seeking a Software Development Engineer role on a high-scale engineering team.

Technical Skills

- **Languages:** C, C++, Python, Java
- **Technologies:** React JS, Spring Boot, FastAPI, MySQL, MongoDB, Bootstrap, HTML/CSS, REST APIs
- **Core CS:** Data Structures & Algorithms, Operating Systems, Computer Networks, Database Management Systems, Machine Learning

Experience

ZS Associates June 2025 – Present
Business Technology Solutions Associate *Pune, Maharashtra*

- **Testra – AI-Powered Test Management & Automation Platform:** Built and scaled frontend and backend features supporting UI, ETL, CRM, API, and BI testing workflows, including grid-level test-case creation, editing, bulk operations, and test-suite configuration.
- Designed REST APIs for bulk test-case import from CSV with validation, background workflows, and multithreaded batch/parallel processing for large-scale data ingestion, plus workflows for bulk-updating test-suite configurations across environments.
- **Business Rule Management System (BRMS) – Data Quality Platform:** Engineered REST APIs and frontend modules for creating, editing, cloning, and managing data quality rules and execution jobs, extending them with versioning and audit history.
- Delivered phase-2 governance features – ticketing/promotion workflows, lifecycle-based rule states, environment-specific views, and RBAC-driven access control – for rule approval and migration across dev, test, and production.
- **ContractIQ – Contract Intelligence Platform:** Developed the contract repository with advanced search and filtering, fixed frontend issues, and contributed to role-based access control with user restrictions and secure redirection.
- **Asset Wizard:** Enhanced features and UI, and fixed bugs, for an enterprise contract-intelligence chatbot; assisted in testing and validating contract-extraction accuracy across contract types.

Projects

Semantic Comment Clustering & Engagement Service | *Python, SBERT, DBSCAN, Flask, MongoDB, React*

- Built a service to enhance creator-subscriber engagement using Sentence-BERT and DBSCAN for semantic clustering of comments, with a cosine-similarity chatbot for automated query responses.
- Shipped a Flask + React + MongoDB system for cluster visualization, reply management, and engagement analytics; findings published in two IEEE papers (see Achievements).

Restaurant Order Management System | *React JS, Spring Boot, MySQL, Bootstrap*

- Built an end-to-end order-management platform with backend REST APIs coordinating waitstaff, kitchen, and delivery workflows, persisting order data for downstream analysis.

Achievements

- **1st Place, Takeda AI Hackathon (ZS Associates):** Built ATLAS, an automated QA pipeline validating Tableau dashboards against Databricks data, cutting dashboard-validation turnaround by 30–40%.
- **Competitive Programming:** Solved 1500+ LeetCode problems; maintained 1000-day, 500-day, and 365-day solving streaks.
- **Publications:** *Optimizing User-Content Creator Engagement via Semantic Comment Clustering, Automated Chatbots, and Sentiment Analysis* and *Semantic Comment Analysis for Engagement Optimization* – both published in IEEE.
- **Redington Scholarship** recipient for academic merit and education funding.
- Ranked 47,807 in JEE MAIN 2021; 99.63 percentile in MHT-CET 2021.

Education

Pune Institute of Computer Technology May 2025
Bachelor of Computer Engineering – CGPA: 9.22/10.00 *Pune, Maharashtra*

SSH Junior College 2021
HSC (XII) – 88.33% *Navi Mumbai, Maharashtra*

Ryan International School 2019
CBSE (X) – 91.80% *Navi Mumbai, Maharashtra*
